-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species 1 as shown in Figs. 2, 2a and 2b;

Species 2 as shown in Figs. 3, 3a, 3b and 3c;

Species 3 as shown in Figs. 4, 4a and 4b;

Species 4 as shown in Fig. 4c;

Species 5 as shown in Figs 5, 5a and 5b;

Species 6 as shown in Figs. 8-11a, 11b and 13;

Species 7 as shown Figs. 15 and 16;

Species 8 as shown in Fig. 17;

Species 9 as shown in Fig. 18;

Species 10 as shown in Fig. 19;

Species 11 as shown in Fig. 20;

Species 12 as shown in Fig. 21;

Species 13 as shown in Fig. 22;

Species 14 as shown in Fig. 23;

Species 15 as shown in Fig. 24;

Species 16 as shown in Fig. 25;

Species 17 as shown in Fig. 26;

Species 18 as shown in Fig. 27;

Species 19 as shown in Figs. 28 and 29; and

Species 20 as shown in Figs. 30-32.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species with appropriate figure(s) of drawing, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Claims 1, 2, 6, 8, 19, 20, 24-35, 46, 49 and correspond to species 1;
Claims 1, 3, 7, 8, 16, 17, 24, 39, 40, 43-48, 51 correspond to species 2;
Claims 1, 3, 9, 10, 24, 27, 42 correspond to species 3;
Claims 1, 3, 15 correspond to species 4;
Claims 1, 3, 13, 14, 18, 24, 36-38, 41 correspond to species 5;
Claims 1, 3, 4, 13, 19, 21, 22, 46, 51-93 correspond to species 6
Claims 94-97 correspond to species 12;
Claims 1, 5, 19, 23, 98-114 correspond to species 17;
Claims 115-118 correspond to species 19.

Art Unit: 2644

The following claim(s) are generic: none.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the special technical feature of species 1 invention is the particular of an electrostatic film transducer claimed therein while the special technical feature of species 2 invention is the particular of an array of elongate arcuate emitter sections formed within the film having a configuration of a rectified sine form as claimed therein while the special technical feature of species 3 invention is the particular of an array of elongate arcuate emitter sections formed within the film having a sine form as claimed therein while the special technical feature of species 4 invention is the particular of selecting a diaphragm having a dipolar propagation mode claimed therein while the special technical feature of species 5 invention is the particular of concave dimpled transducer diaphragm claimed therein while the special technical feature of species 6 invention is the particular of a hollow drum and a rigid emitter plate claimed therein while the special technical feature of species 12 invention is the particular of foam member including conductive properties and small cavities as claimed therein while the special technical feature of species 17 invention is the particular of a magnetic film diaphragm claimed therein while the special technical feature of species 19 invention is the particular of a rigid core member including means for enhancement of at least one resonant frequency operable as a carrier frequency as claimed therein.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

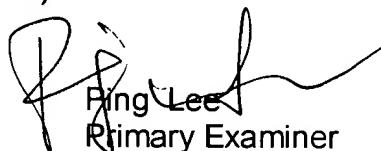

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ping Lee whose telephone number is 571-272-7522.

The examiner can normally be reached on Monday and Friday.
